PROFILE

Full-stack and mobile developer who ships complete products, not just code. Creator of ClauseShift, an AI contract reviewer live on the web, the Amazon Appstore, and the Microsoft Store: I built the Next.js backend and AI pipeline, the Flutter apps, self-serve billing, the release automation, and a marketing site in six languages. Also the maintainer of Custom RR, an open-source Android app shipped across five platforms. CEH certified, hackathon builder, and verified Upwork freelancer. Open to roles, freelance projects, and hard problems.

TECHNICAL SKILLS

FRONTEND	React, Next.js, TypeScript, Tailwind CSS
BACKEND & APIS	Node.js, Express, Python, REST APIs, JWT Auth
MOBILE	Flutter, Dart, React Native, Android / iOS releases
DATA & CLOUD	PostgreSQL, MongoDB, Firebase, Supabase, Docker, Railway, Vercel, GitHub Actions CI/CD
AI & WEB3	LLM integration (Gemini, Claude), prompt pipelines, Solidity, Foundry, Ethers.js
SECURITY	Ethical hacking (CEH), OWASP fundamentals, data protection compliance

EXPERIENCE

Full-Stack & Mobile Developer

solo, end to end

2026 - Present

ClauseShift

- Built and run ClauseShift, an AI contract reviewer that cites the exact clause behind every risk it flags.
- Own the whole stack: Next.js backend and AI pipeline, Flutter mobile and desktop apps, self-serve billing, and analytics.
- Shipped to production on the web, the Amazon Appstore, and the Microsoft Store, with automated multi-store release pipelines.
- Run a localized marketing site in six languages with SEO structured data end to end.

Business Application Support Attachee

Jan 2026 - Mar 2026

Kenya Revenue Authority (KRA), Nairobi

- Supported business-critical applications at Kenya's national tax authority in a large, high-stakes environment.
- Triaged and resolved technical issues and kept core systems running alongside IT mentors.

Freelancer

2023 - 2024

Upwork · verified profile with client reviews

- Delivered IT support and software consulting projects for international clients, earning verified positive reviews and repeat business.

Freelance Web Developer

Self-employed

- Built websites and applications for local businesses and personal projects: clean code, clear communication, shipping on time.

2020 - 2022

SELECTED PROJECTS

ClauseShift

live product

Next.js · Flutter · AI

AI contract review with clause-level citations. Live on the web and two app stores, with billing, six-language localization, and automated store releases.

Custom RR

open source

Flutter · 5 platforms

Open-source Android hub for custom ROMs and recoveries, maintained and shipped across five platforms with fully automated CI/CD releases.

NanoPay

hackathon

Solidity · Node.js

Per-request AI API where every query costs \$0.001 USDC settled onchain (Arc blockchain). Solidity contract verifies micropayments before returning Gemini responses; 57+ live onchain transactions demonstrated.

Aegis, SRE Guardian

hackathon

Python · AI agents

Autonomous incident-response system: a three-agent AI pipeline (monitor, diagnose, remediate) that executes whitelisted SSH fixes and auto-generates PDF post-mortems. Built for the AMD Developer Hackathon.

EDUCATION

BSc Business Information Technology (BBIT)

Second Class Honours, Upper Division

KCA University, Nairobi

Diploma in Business Information Technology

KCA University, Nairobi
